

A bold and bright PHP Developer (MVC)

This is what we care about:

- You approach development problems systematically from multiple angles, understanding there are pros and cons to all solutions.
- Maintain organization and documenting progress is key in order to explain your thinking and gain consensus from your team.
- Understanding the target audience. You create products with the user in mind
- Collaboration and iteration. You work with design, engineering, and business units and believe that creating fantastic user experiences involves everyone and is the result of rigorous critique and an open mind.
- Passion about what you do. You care about the big picture of how technology can bring positive change, as well as every last detail of how people interact with our product.
- Working fast and efficiently is second nature.

At Inspirething you will:

- Develop high-quality consumer and merchant facing products.
- Bring to market a best-in-class user-facing experiences on the web, tablet, and mobile.
- Work with designers, other developers, marketing, and business teams.
- Develop hours and days, not weeks and months.

Who you are:

- A developer at heart. You're smart, articulate, and business minded. You think critically before you start to code. You make cool things and can explain to others why they're cool. You can work with a team. Because we're a small multi disciplinary team strong communications is of vital importance. You are nice and grounded, and people love working with you.
- You love working in a team of accomplished designers and creative developers who like exchanging ideas while constantly trying to take things a step further.

You have:

- A portfolio demonstrating a range of capabilities and understanding across various formats and methodologies, e.g. websites, software applications, mobile/tablet UI and apps,.
- College / Academic level thinking.

In the past, you:

- Worked on a variety of digital projects.
- Translated wireframes.
- Collaborated with designers and other developers
- Worked under quick deadlines. Efficiency is second nature.
